The promise at the other end

AI that helps your people deliver

A customer story about
AI and business value

Meghan Fasano / Independent concept
Fictional scenario. Not official Microsoft material.

Friday

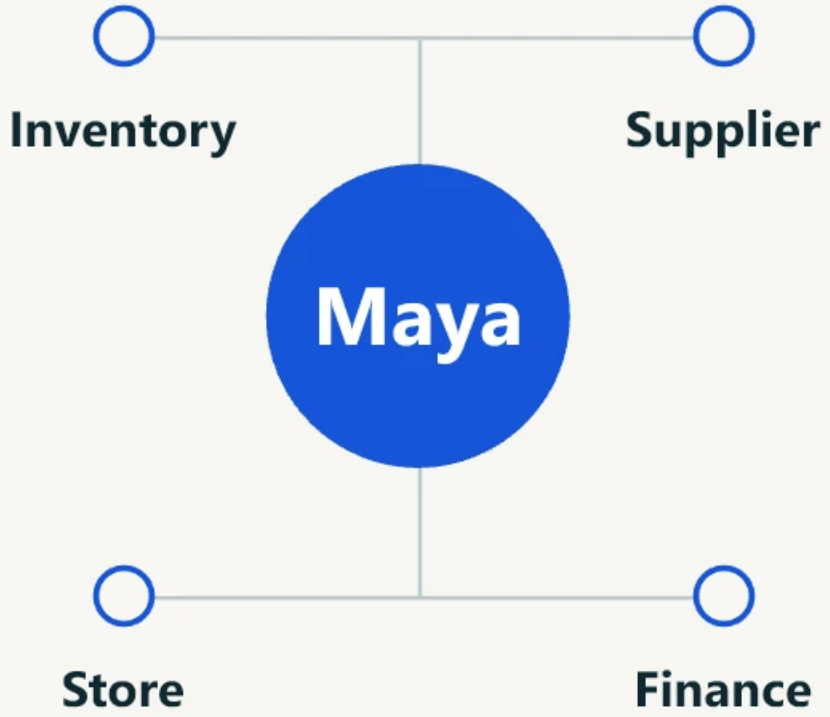

Will we be ready?

A critical delivery has slipped.

Four systems. One person in the middle

Maya carries the handoffs.

An answer. And a way forward

See	Plan	Approve	Act

Your intelligence. Working for you

Microsoft industry expertise and AI engineering

PROTECTED BY YOUR RULES

Data

Experience

Decisions

Clarity includes what’s missing

Evidence before commitment.

KNOWN

Delivery delayed

POSSIBLE

Replacement nearby

UNCONFIRMED

Carrier timing

A recovery plan people can act on

01

Find an alternative

02

Check the cost

03

Prepare the handoff

Maya decides

AI prepares the options.

Maya approves the commitment.

If uncertain, pause and escalate.

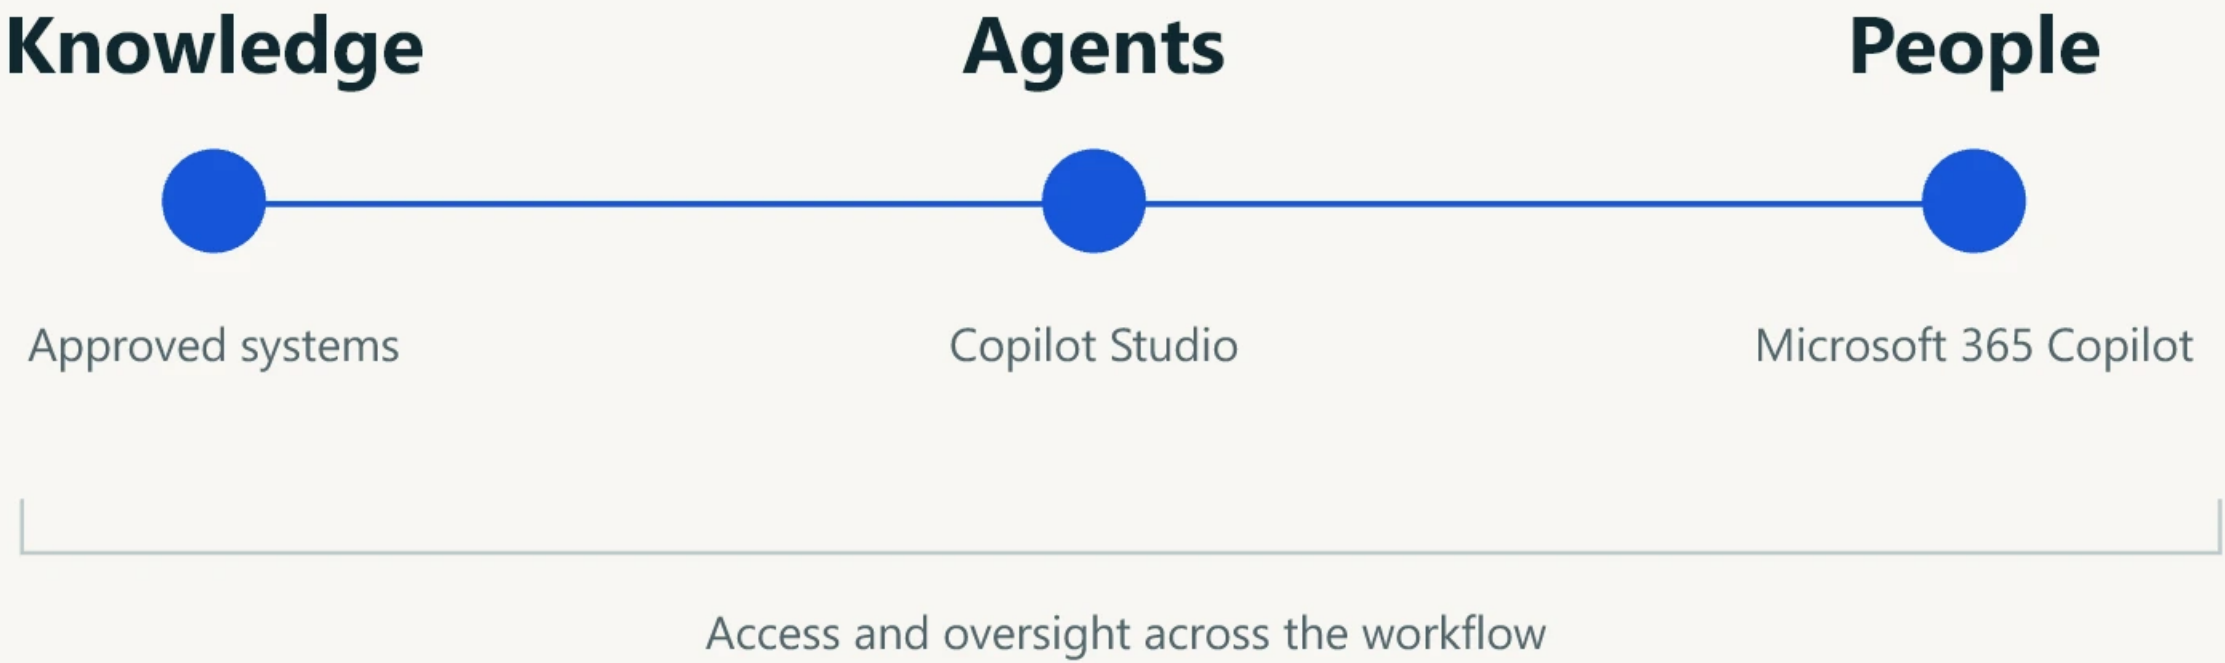

The promise moves closer

Approved action.
Named owner.
Verified result.

Illustrative recovery scenario

The technology follows the work

Did we keep the promise?

Baseline first.
Targets agreed together.

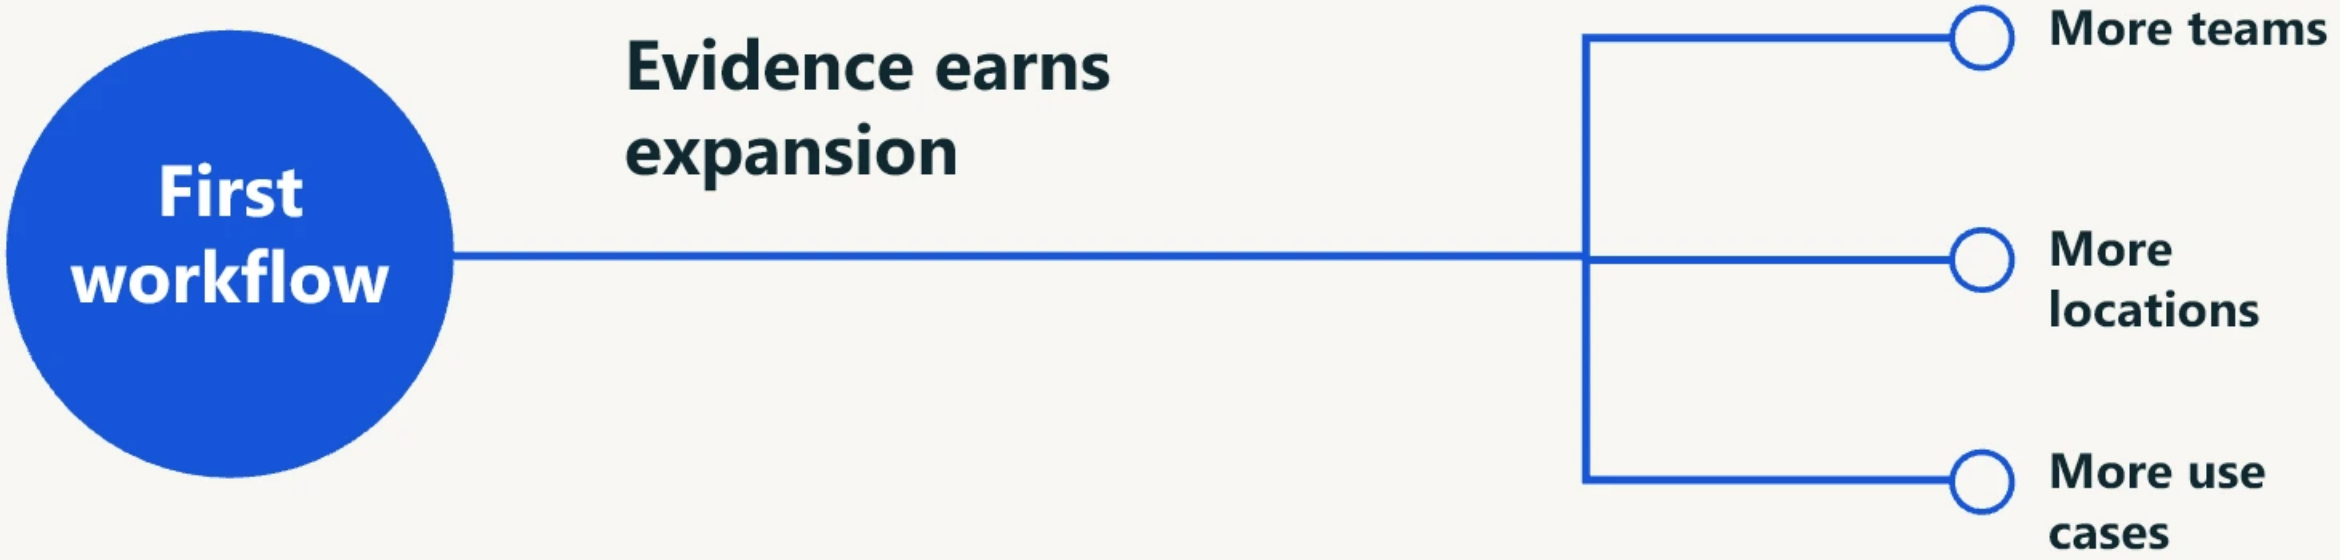

Resolution time

Commitments kept

Repeat contact

Cost per exception

One workflow. Room to grow

Production value, with a path to scale.

Which customer promise comes first?

Let’s choose the work that matters most.
